WHAT EXPOMAPPING DO?

ExpoMapping.com is a brand of Prinknest Technology LLP. It provides an Interactive Floor Plan & QR code enabled registration & ticket management Solution for expos, events & conferences.

Interactive Floor Plan (IFP) is a widely used service to create and automate your upcoming event's booths or stalls. With our automated IFP solutions, you can now focus on sales by showcasing your event floor plan online. You can also sell stalls with all amenities available on-demand.

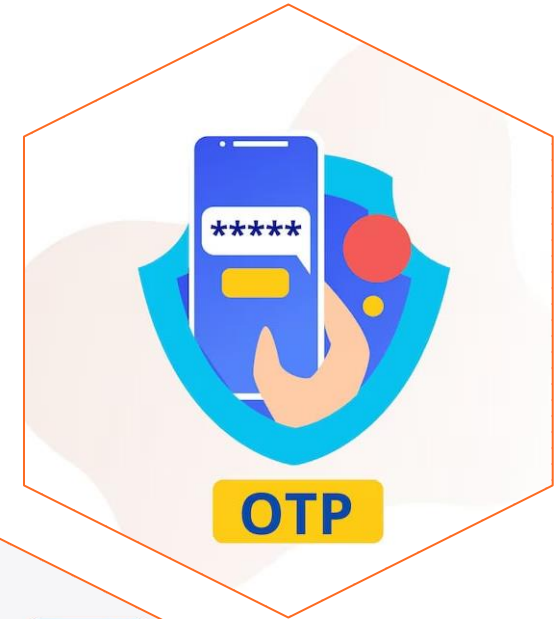

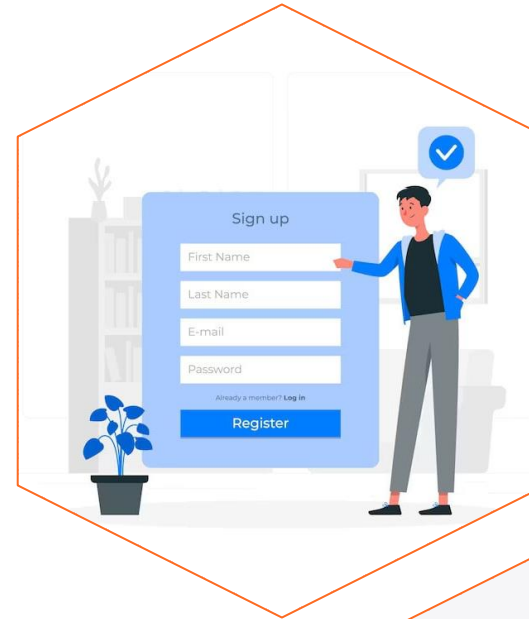

We provide an efficient QR code-enabled delegate registration & ticket management solution that automates the entire process, from registration and OTP verification to acceptance or decline, with or without a moderator. Our system also offers automated visitor pass printing, ensuring a seamless experience for event organizers and attendees.

Our software helps your customers make fast & informed decisions. This is because we offer detailed insights i.e., booth size, available amenities, extra on-demand amenities offerings, prices, and most importantly, real-time payment and booking confirmation.

QR Code Enabled Registration Management

Features Highlight

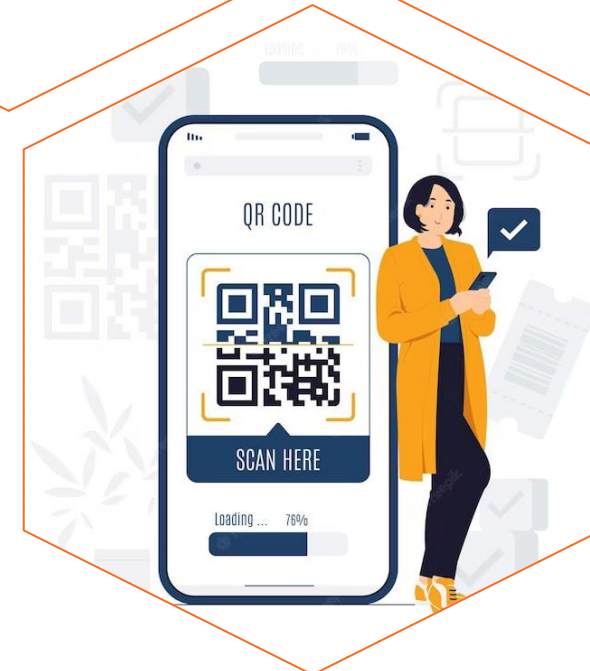

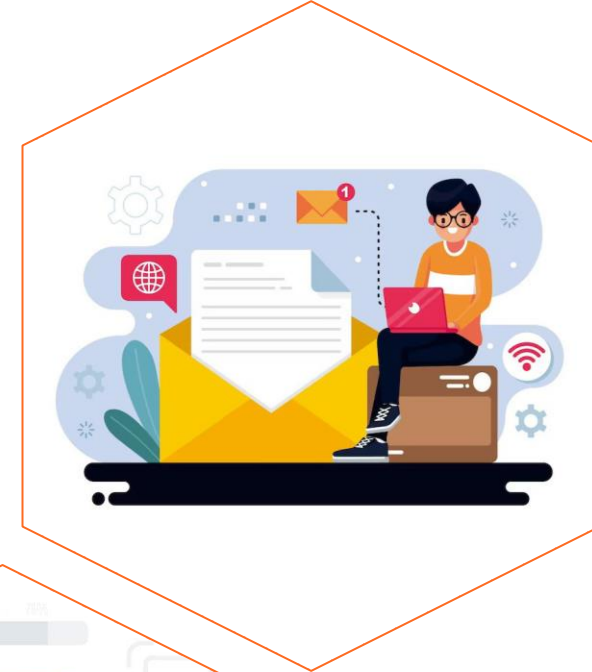

- **Registration Form:** Fully dynamic Registration form, you can create as many types of fields as you want. A SaaS-based model with easy API access.
- **OTP Verification:** To ensure registration authenticity, the application includes an OTP (One-Time Password) verification feature through email & WhatsApp. This helps validate delegates' and visitors' contact information during registration.
- **With or without Moderator:** If you would like to shortlist a specific registration type, you can also enable a moderator. Activate automatic acceptance of all registrations without a moderator with a single click

QR Code Enabled Registration Management

Features Highlight

- **Automated Email Confirmation:** Registered users will get automated emails (with dynamic e-mail contents modified from the admin portal) at every step. Includes OTP verification, Acceptance, or Decline.
- **Ticket Management:** Create & showcase all ticket benefits dynamically. Full control over multiple or single ticket bookings with every registration.
- **QR Code Integration:** The application utilizes QR codes as a means of identification and access control. Each delegate or visitor receives a unique QR code associated with their registration details. This code can be scanned at various checkpoints within the event to track attendance and grant access to authorized areas.

QR Code Enabled Registration Management

Features Highlight

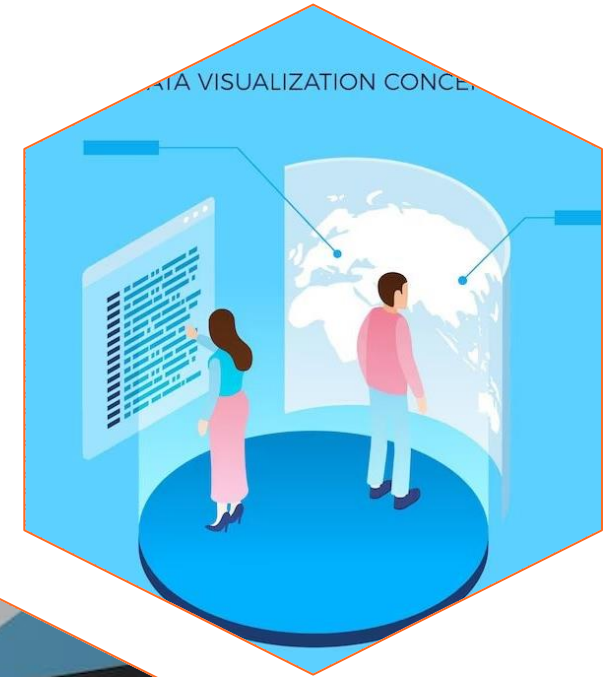

- **QR Code-based Automated Visitor Pass Printing:** Once a delegate or visitor is approved, the application automates visitor passes. The passes can contain a QR code that serves as an identifier and grants access to specific areas or sessions within the event.
- **Seamless Management:** With this application, event organizers can manage the entire registration process, verify attendees, track attendance, and print visitor passes from a centralized platform. This streamlines operations reduces manual effort and ensures a seamless experience for both organizers and attendees.

QR Code Enabled Registration Management

ADDITIONAL FEATURES

- Dynamic & automatic QR code facility to restrict frauds
- Completely customizable front-end (Background image, logo, logo positioning, form color, form outline, etc.)
- Fully controllable & customizable OTP & Thank You page
